

Safety information

According to the definition in Article 3 of Regulation (EC) No. 1907/2006 (= REACH Regulation) this product is considered as an “article”.

“Article” = an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition.

The REACH Regulation also clearly states that a safety data sheet is only required for certain substances/preparations, so not for articles. That is why we decided not to provide a safety data sheet for this product. If you would ever be in a situation in which you think you need safety related information about this product, please do not hesitate to contact us.
